Bikesh Shrestha

Software Engineer | (+977)9819391148 | https://github.com/undead-bacteria | er.bikesh.shrestha@gmail.com | Kathmandu

Summary

Results-driven Full Stack Developer with proven experience building scalable web applications and RESTful APIs using Python (Django, FastAPI) and JavaScript (MERN stack). Skilled in backend development, database design (SQL, MongoDB), and deploying applications to AWS and other cloud platforms. Adept at writing clean, maintainable code and collaborating in Agile teams.

Experience

Veer Group | New York, NY
Full Stack Software Engineer (Contract) | 01/2026 - Present

- Architected and deployed scalable databases on Kubernetes, improving reliability and performance.
- Built and enhanced Next.js applications with LLM integrations to enable intelligent workflows.
- Containerized and managed services with Kubernetes, implementing autoscaling and monitoring.
- Optimized performance, resolved production issues, and maintained clean, scalable codebases.
- Collaborated with cross-functional teams to deliver high-quality, user-centric solutions.

SUSANKHYA FutureTech PVT. LTD. | Kathmandu, Nepal
Full Stack Developer | 09/2025 - Present

- Developed and maintained web applications using Python (Django/Flask) and JavaScript (React/Next.js).
- Integrated APIs, databases, and third-party services for seamless data flow and authentication.
- Wrote unit and integration tests to improve code reliability and reduce production bugs.
- Collaborated with teams to deliver scalable, high-performance features and optimize code quality.

EsyGrab | Kathmandu, Nepal
Software Engineer | 02/2025 - 09/2025

- Developed and maintained web applications using the MERN stack (MongoDb, Express.js, React.js, Node.js) and Next.js
- Designed and built responsive, user-friendly interfaces, integrating RESTful APIs for enhanced user experience.
- Utilized Docker for containerization and utilized Supabase for real-time database functionality and front-end hosting.
- Collaborated with a remote team using Git and agile methodologies to ensure smooth development workflows.
- Implemented cloud technologies, CI/CD pipelines, and performance tuning to optimize production applications.

GenFourTech | Dubai, UAE
Backend Developer | 08/2024 - 11/2024

- Developed and optimized RESTful APIs using Django and PostgreSQL, reducing response time by 30%.
- Assisted in database design and optimization, improving query efficiency by 25%.
- Migrated legacy database queries, improving data retrieval performance.
- Collaborated with frontend developers to integrate APIs seamlessly, enabling faster feature delivery.
- Participated in code reviews and knowledge-sharing sessions to boost team productivity.

GenFourTech | Dubai, UAE
Backend Developer Intern | 05/2024 - 08/2024

- Assisted in building scalable backend architectures using Django and MySQL.
- Designed and maintained database schemas, improving data integrity by 20%.
- Conducted query optimizations and performance tuning, reducing server load by 15%.
- Gained hands-on experience with Agile development and version control (Git).

Skills

- Languages: Python, JavaScript
- Frameworks & Libraries: Django, Fast API, Express.js, Next.js, Node.js
- Databases: MongoDB, PostgreSQL, MySQL
- Cloud & DevOps: Docker, Kubernetes, AWS S3(Basic), Firebase, CI/CD Pipelines
- Tools: Git, Postman, Agile/Scrum

- Software Design: RESTful API Development, MVC Architecture, OOP
- Soft Skills: Problem-Solving, Team Collaboration, Adaptability, Time Management

Education

Purbanchal University School of Engineering | Biratnagar, Nepal
Bachelor of Engineering in Computer Science
2019/04 - 2023/04
